PROFILE

I'm a passionate AI and Full Stack Developer with a love for creating beautiful, functional, and user-friendly projects. With expertise in modern web technologies, I transform ideas into engaging digital experiences.

I work across both frontend development and AI/ML. On the web side, I build responsive, user-centric interfaces using HTML, CSS, JavaScript, and React. As an AIML student, I also explore machine learning models, data-driven solutions, and AI-powered applications. Whether it's crafting clean UI components or experimenting with intelligent systems, I enjoy combining design, code, and innovation to create meaningful digital experiences.
